WHALES

how much does the biggest wallet hold?

5.6% of all KAS in circulation

1,542,974,288 KAS · 1 nov 2026

one coin lit = the share of all KAS in this one wallet

one wallet holds about one in every 18 KAS. explorers call it entity x. it has never been named.

HOW TO READ IT

its address is public. we check it several times a day. last move of 100,000 KAS or more, 15 oct 2026, 3,859,963 KAS left.

SIGNAL TO WATCH

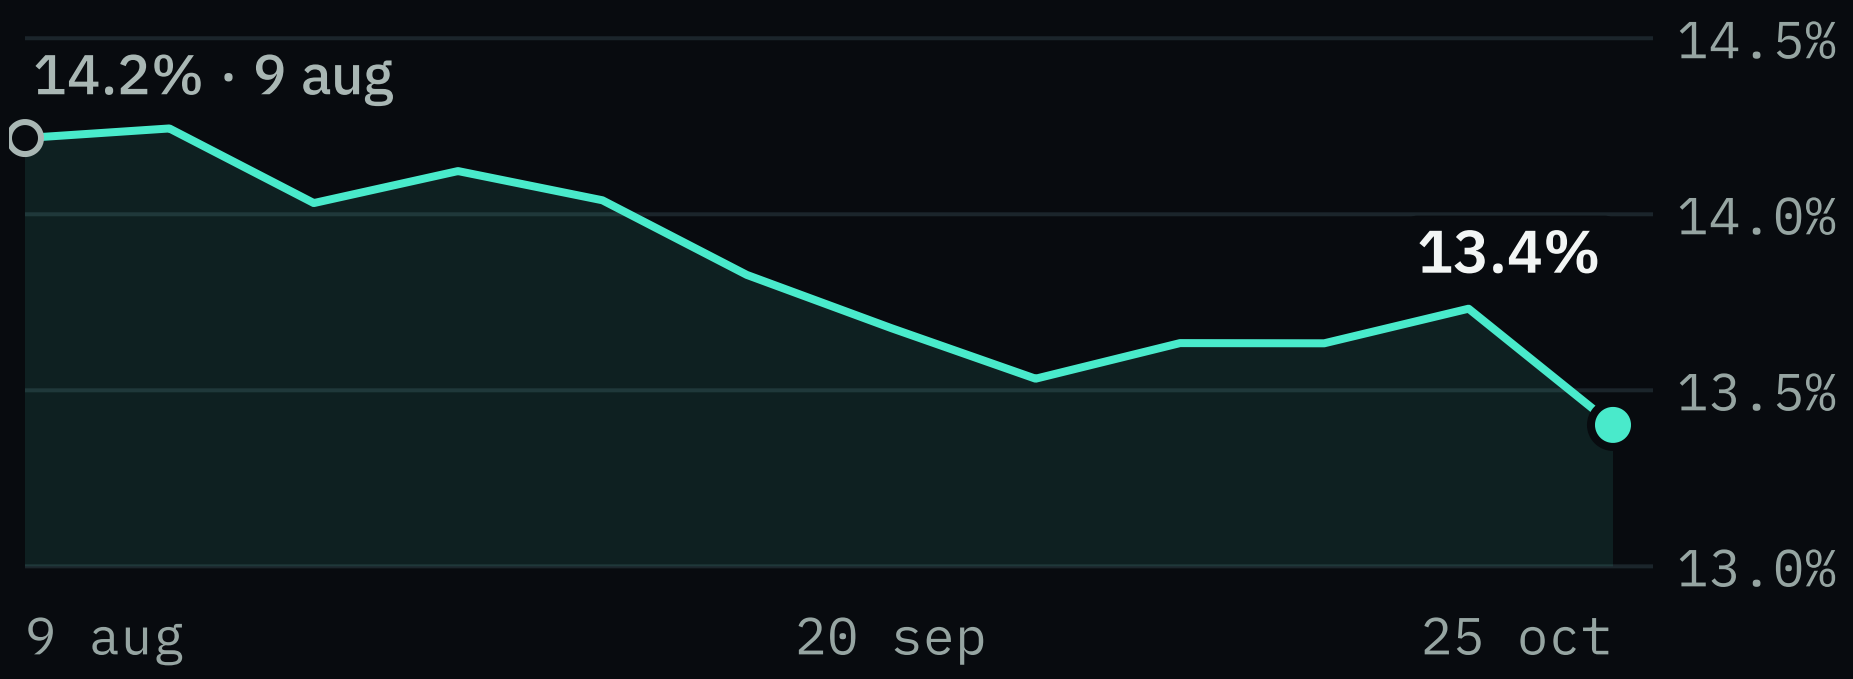

large amounts leaving it, and where they land.

WHALES

how much KAS sits on exchanges?

13.4% of all KAS, about one in seven

3,722,422,346 KAS · 25 oct 2026

coins on exchanges can be sold fast. that share has slipped from 14.2% in august to 13.4% on 25 oct.

HOW TO READ IT

share of all KAS in wallets labelled as exchanges. one snapshot at midnight utc, logged by us every week since august. a falling share means coins left exchange wallets.

SIGNAL TO WATCH

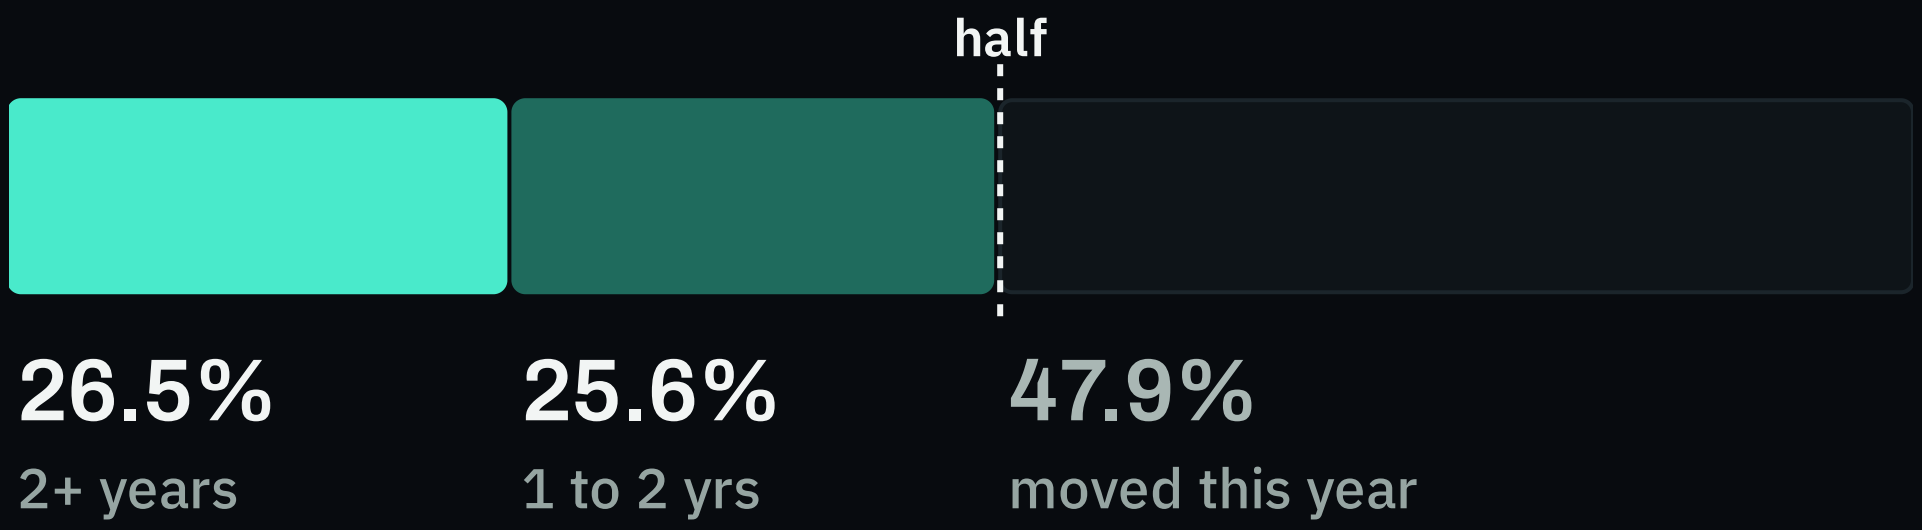

rising share, more coins within reach of a sale, often read as selling pressure. falling share, coins leave for private wallets.

HOLDERS

how much KAS has not moved in a year?

52.1% of all KAS, untouched for 1 year or more

31 oct 2026 · 26.5% untouched for 2 years

26.5%
2+ years

25.6%
1 to 2 yrs

47.9%
moved this year

half of all KAS has not moved in a year. a quarter has not moved in two.

HOW TO READ IT

the age of each coin comes from the daa score of its last move. logged by us every week since july, the share sat between 50.5% and 51.3%.

SIGNAL TO WATCH

a sudden drop. that is old coins waking up.

HOLDERS

how many wallets hold a real stake?

295,772 addresses with 100 KAS or more

25 oct 2026 · +1,262 in 7 days · +2,534 in 30 · +4,277 in 90

0.01 KAS or more	768,253
1 KAS or more	566,188
100 KAS or more	295,772

almost 300,000 wallets hold 100 KAS or more. the last month added about 3,000, the last 90 days are clearly positive.

HOW TO READ IT

one exchange address can hold thousands of users, one person can hold many addresses. 54.9 million addresses hold something, almost all of it dust below 0.01 KAS.

SIGNAL TO WATCH

the 30 day direction of the 100+ line.

MINERS

when do miners get paid less again?

4 nov

next block reward cut,
13:45 utc

2.06 to 1.94 KAS per block · 3 days from 1 nov

KAS per block · one bar per monthly step

every month kaspa pays a little less per block. twelve steps halve the reward. the next one is on 4 november.

HOW TO READ IT

factor 0.5 to the power 1/12 per step, one step every 365.25 / 12 days, 10 blocks per second. the cut lands on a block score, so the exact minute drifts a little.

SIGNAL TO WATCH

whether fees grow while the reward shrinks. see number 6.

MINERS

what actually pays the miners?

647x more KAS from new coins than from fees

30 days, 2 oct to 31 oct 2026

647 squares new coins — **1 bright square fees**

for every 1 KAS miners earned in fees, they got 647 KAS in new coins. the network is paid by issuance.

HOW TO READ IT

53.73 million KAS new coins against 83,101 KAS fees, the same 30 full utc days for both. a day without a fee value drops out of both sides.

SIGNAL TO WATCH

the ratio falling because fees rise.

SECURITY

how much computing power guards kaspa?

365 PH/s, mean of the last 7 days

25 to 31 oct 2026 · single day 381 on 25 oct

365 quadrillion guesses every second protect the chain. about 13% more than in early september.

HOW TO READ IT

one reading a day from api.kaspa.org, no smoothing. single days jump by 10%, so we show the 7 day mean. gaps are days without a reading.

SIGNAL TO WATCH

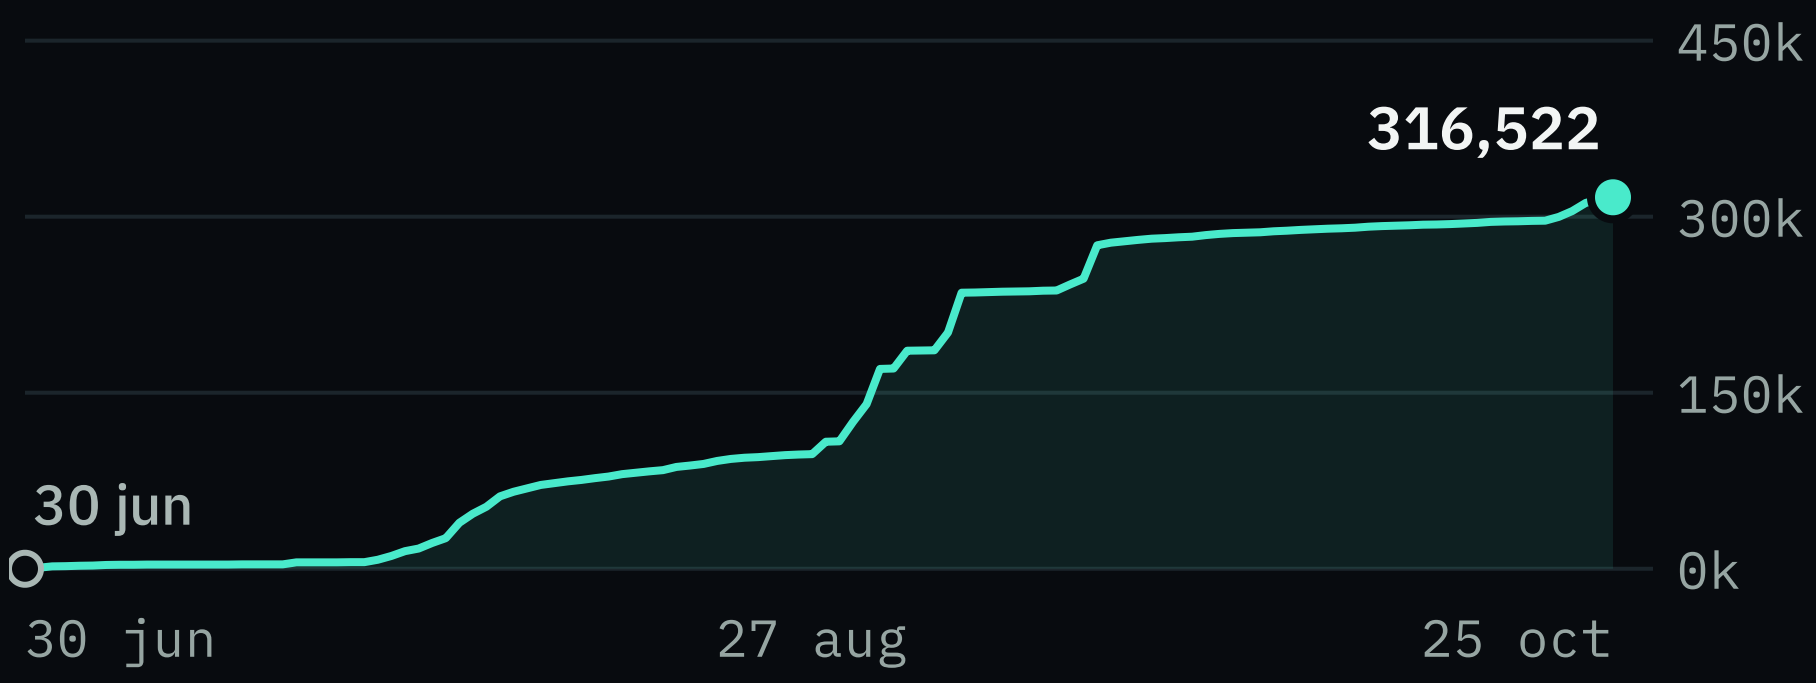

a drop that lasts for weeks.

ADOPTION

are kaspa smart contracts being used?

316,522 covenant outputs created since 30 june

25 oct 2026 · 18,006 still unspent

since the toccata upgrade launched on 30 june, covenants have been created 316,522 times. they come in waves.

HOW TO READ IT

covenant outputs created per day, summed. most are spent again soon, tests and bots count too.

SIGNAL TO WATCH

the unspent stock. it grows steady, the traffic comes in waves.

every number has a date.

01 **a date and a source on every number.** so you can check each one.

02 **sourced, not guessed.** what we count ourselves says counted, the rest names its source.

03 **plain words first.** the detail for the nerds right below.

04 **we keep the history.** logged by us, checked for breaks, sources named so you can check us.
