WHALES

# how much does the biggest wallet hold?

**5.5%** of all KAS in circulation

1,527,589,469 KAS · 10 oct 2026

one coin lit = the share of all KAS in this one wallet

one wallet holds about one in every 18 KAS. explorers call it entity x. it has never been named.

### HOW TO READ IT

its address is public. we check it several times a day. last move of 100,000 KAS or more, 1 oct 2026, 4,517,808 KAS left.

### SIGNAL TO WATCH

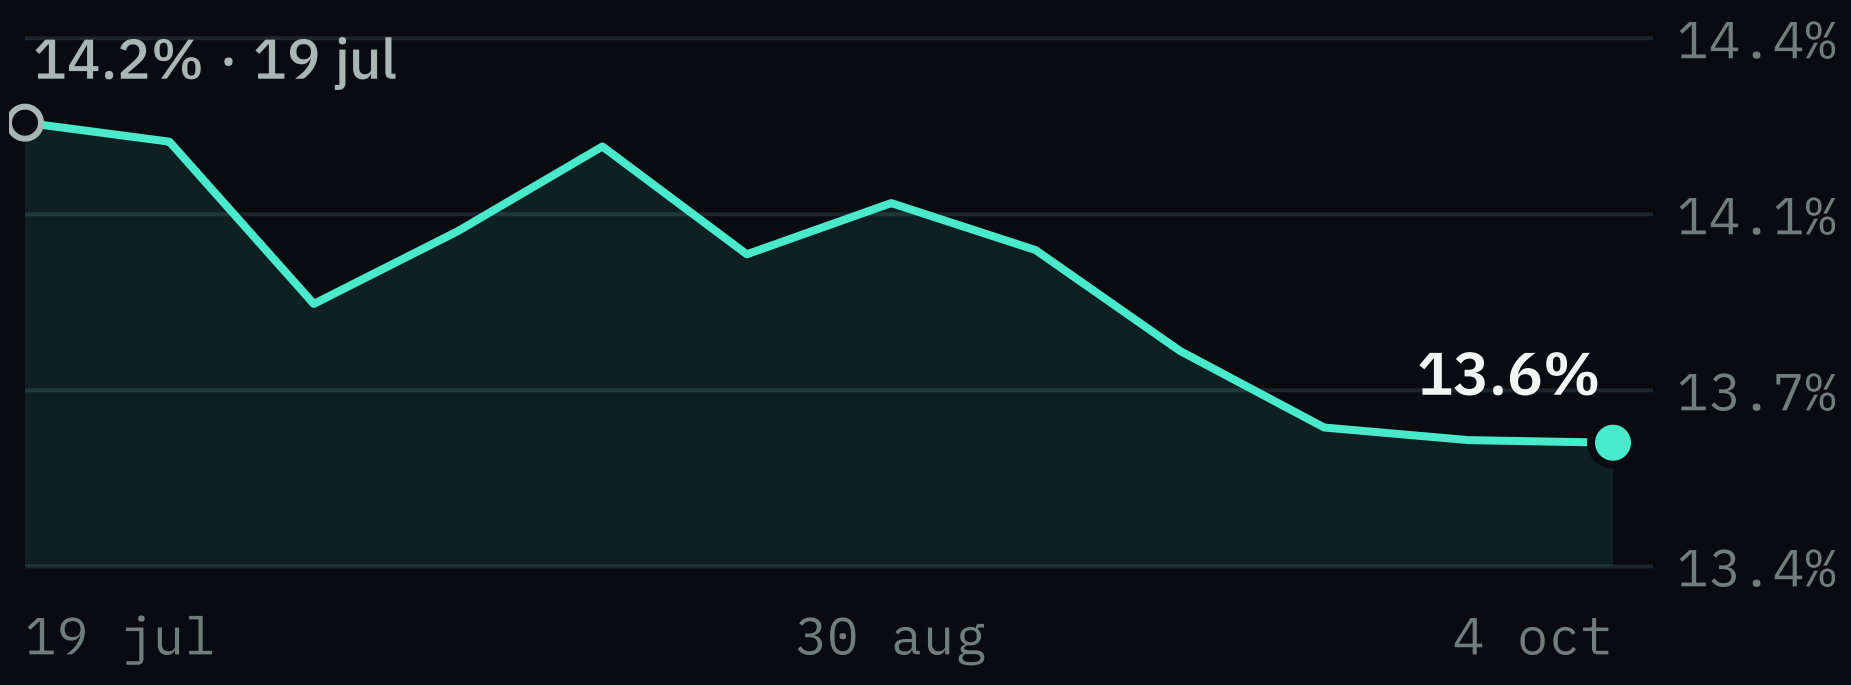

large amounts leaving it, and where they land.

WHALES

# how much KAS sits on exchanges?

**13.6%** of all KAS, about one in seven

3,781,925,849 KAS · 4 oct 2026

coins on exchanges can be sold fast. that share has slipped from 14.2% in july to 13.6% now.

### HOW TO READ IT

share of all KAS in wallets labelled as exchanges. one snapshot at midnight utc, logged by us every week since july. a falling share means coins left exchange wallets.

### SIGNAL TO WATCH

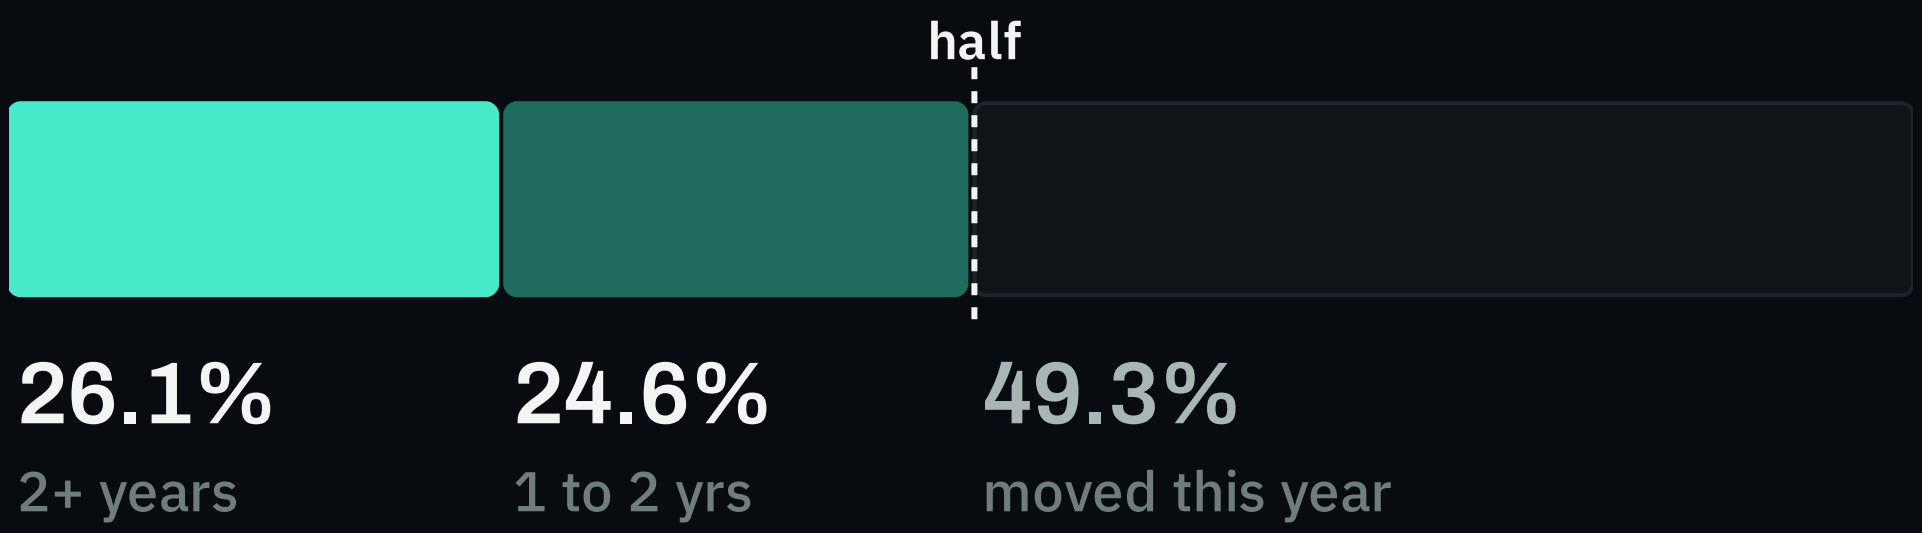

rising share, more coins within reach of a sale, often read as selling pressure. falling share, coins leave for private wallets.

HOLDERS

# how much KAS has not moved in a year?

**50.7%** of all KAS, untouched for 1 year or more

6 oct 2026 · 26.1% untouched for 2 years

half of all KAS has not moved in a year. a quarter has not moved in two.

### HOW TO READ IT

the age of each coin comes from the daa score of its last move. logged by us every week since july, the share sat between 50.5% and 51.0%.

### SIGNAL TO WATCH

a sudden drop. that is old coins waking up.

HOLDERS

# how many wallets hold a real stake?

**293,978** addresses with 100 KAS or more

4 oct 2026 · +520 in 7 days · +2,061 in 30 · −718 in 90

| | |
|---|---|
| 0.01 KAS or more | 761,033 |
| 1 KAS or more | 560,175 |
| 100 KAS or more | 293,978 |

almost 300,000 wallets hold 100 KAS or more. the last month added about 2,000, the last 90 days are slightly negative.

### HOW TO READ IT

one exchange address can hold thousands of users, one person can hold many addresses. 54.9 million addresses hold something, almost all of it dust below 0.01 KAS.

### SIGNAL TO WATCH

the 30 day direction of the 100+ line.

MINERS

# when do miners get paid less again?

# 4 nov

next block reward cut,
13:45 utc

2.06 to 1.94 KAS per block · 24 days from 11 oct

KAS per block · one bar per monthly step

every month kaspa pays a little less per block. twelve steps halve the reward. the next one is on 4 november.

### HOW TO READ IT

factor 0.5 to the power 1/12 per step, one step every 365.25 / 12 days, 10 blocks per second. the cut lands on a block score, so the exact minute drifts a little.

### SIGNAL TO WATCH

whether fees grow while the reward shrinks. see number 6.

MINERS

# what actually pays the miners?

**765x** more KAS from new coins than from fees

30 days, 3 sep to 2 oct 2026

765 squares new coins — **1 bright square fees**

for every 1 KAS miners earned in fees, they got 765 KAS in new coins. today the network is paid by issuance.

### HOW TO READ IT

56.77 million KAS new coins against 74,187 KAS fees, the same 30 full utc days for both. a day without a fee value drops out of both sides.

### SIGNAL TO WATCH

the ratio falling because fees rise.

SECURITY

# how much computing power guards kaspa?

**339** PH/s, mean of the last 7 days

4 to 10 oct 2026 · single day 362 on 10 oct

339 quadrillion guesses every second protect the chain. about 4% more than in mid august.

### HOW TO READ IT

one reading a day from api.kaspa.org, no smoothing. single days jump by 10%, so we show the 7 day mean. gaps are days without a reading.

### SIGNAL TO WATCH

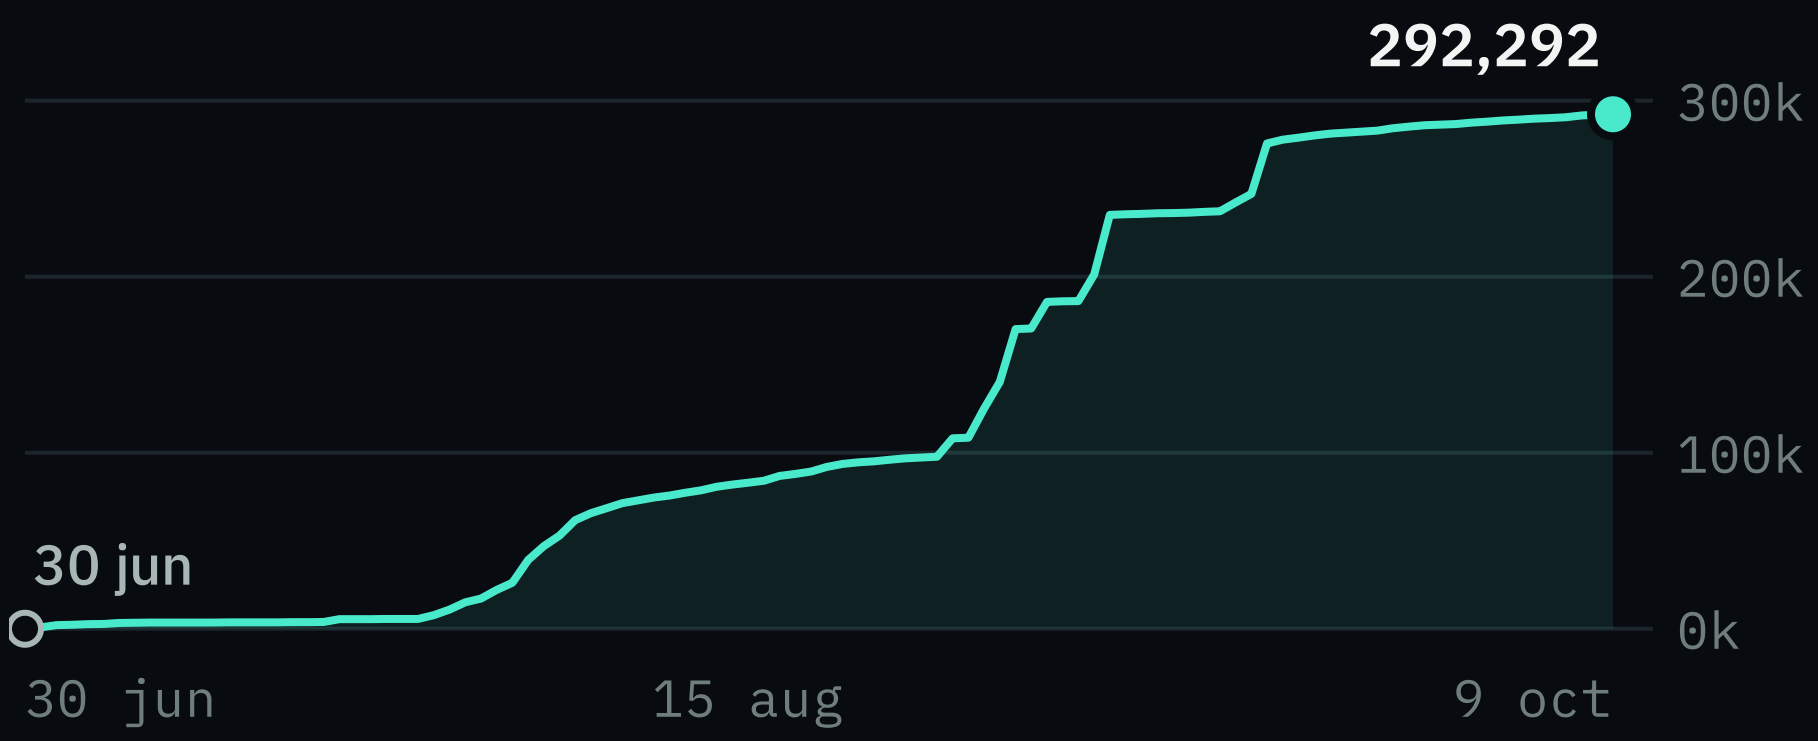

a drop that lasts for weeks.

ADOPTION

# are kaspa smart contracts being used?

**292,292** covenant outputs created since 30 june

9 oct 2026 · 13,936 still unspent

since the toccata upgrade went live on 30 june, covenants have been created 292,292 times. they come in waves.

**HOW TO READ IT**

covenant outputs created per day, summed. most are spent again soon, tests and bots count too.

**SIGNAL TO WATCH**

the unspent stock. it grows steady, the traffic comes in waves.

# every number has a date.

01 **a date and a source on every number.** so you can check each one.

02 **counted, not guessed.** every move straight from the chain.

03 **plain words first.** the detail for the nerds right below.

04 **we keep the history.** logged by us, checked for breaks, sources named so you can check us.
